

USB 脚踏开关 国际首创

用脚控制电脑的USB脚踏开关，可广泛用于游戏，工厂测试，仪器控制，残疾人士等，让你手脚并用，提高效率。

它相当于一个标准的HID的USB键盘和鼠标，它可以通过设置软件，将开关定义成你的键盘的任意按键，按键组合，鼠标或字符串。

可以根据客户要求定制脚踏板数量或式样。一台电脑可以连接多个脚踏板。

提供基于windows系统的按键定义设置软件，设置完成后你可以用于以下系统：

.dos	.Win 2000
.Win xp	.Win vista
.Win 7	.Linux
.MAC	

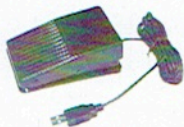

The USB foot switch can be used to control your computer by foot. It is used in playing games, factory testing, controlling instruments, helping the disabled and so on. You can use it by hands or feet for efficiency.

It is equivalent to a standard HID USB keyboard and mouse, but it is customizable by using the setting software, which can define your foot switch as any keys, key combinations, mouse or string. No other software is required.

The number or style of pedals can be customized according to customer's request.

Multiple foot pedals can be connected to a single computer. You can use different key definition software according to your Windows system. After the completion of set up, the switch can be used on the following operating systems:

.Dos	.Win 2000
.Win xp	.Win vista
.Win 7	.Linux
.MAC	

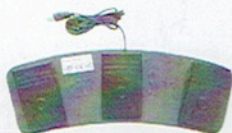

1位塑料脚踏开关 (FS1_P)
One plastic foot switch

3位塑料脚踏开关 (FS3_P)
Three plastic foot switch

1位金属脚踏开关 (FS1_M)
One metal foot switch

3位金属脚踏开关 (FS3_M)
Three metal foot switch
